LONGEVITY REMARKABLE ENERGY, YOUTHFULNESS & PRODUCTIVITY!

Royal Jelly: Whats all the Buzz is about?? Royal Jelly is not the same as pollen or propolis. It's a secretion from the glands in the heads of the worker bees which is secreted to feed the Queen continuously and Worker larvae are only fed 3 days. The Queen Bee is fed large quantities of Royal Jelly, she lives 4-5 years, and the Worker Bees fed with pollen, honey live just 6 weeks. Why? The Secret is Royal Jelly. The Queen is the most energetic and the most remarkable insect in the insect kingdom. Won't you like to live long, be energetic, healthy, youthful-looking, and be as nutritiously fed as the Queen Bee? Epigenetic Effects: The honey bee Queens and Workers represent one of the most striking examples of environmentally controlled phenotypic polymorphism. In spite of their identical, clonal natures at the DNA level they are strongly differentiated across a wide range of characteristics including anatomical and physiological differences, the longevity of the queen and reproductive capacity. A female larva destined to become a queen is fed large quantities of royal jelly that triggers a cascade of molecular event resulting in queen development. It has been shown that this phenomenon is mediated by an epigenetic modification of DNA. This finding suggest that DNA methylation in honey bees allows the expression of epigenetic information to be differentially altered by nutritional input. Royal Jelly is a nutritional powerhouse - all the B vitamins, high concentration of B5, enzymes, 18 amino acids, DNA, relatively high amounts (5%) of fatty acids, 12.5% protein, trace minerals, antibacterial and antibiotic components, Vit C and more... Alice has been taking RJ for over 20 years!

Stress will make your belly larger! Your adrenals suffer tremendously when you are under stress or anxious. Not to worry, Dr Oz recommends Passionflower drops to the rescue! CLA HELPS LOSE WEIGHT!

CLA (Conjugated Linoleic Acid) – “Supplement Helps Cut Fat, Study Finds” Researchers at the Univ. of Guelph & Univ of Wisconsin-Madison, published in the International Journal of Obesity in a six month study, found the group taking 3.2gms (3,200mg) daily of CLA lost 2.2 of fat with a tendency to shed it from the abdomen. The CLA group lost weight despite reporting 40% decrease in physical activity over six months. “Despite no difference between the CLA and the placebo group with regards to calorie intake or physical activity throughout the study, the CLA group still managed to lose weight prior to the holiday season and didn’t gain any weight over the holidays”, said Andrea Buchholz, a professor of nutrition at Guelph Univ. She also said CLA “increases fat-burning in the body”, and “it also keeps fat cells from proliferating and it causes pre-fat cells to kill themselves”. She would still remind customers to continue with exercise and dieting “You want to maximize it’s effectiveness”. NPN #80017761

LOW IRON CAUSE HAIR LOSS!

Ironsmart to STOP HAIR LOSS !! – Loma Vanderhaeghe... “Hair Loss in women is caused by low iron, low thyroid and not enough minerals in the diet. Low Iron is the most common reason for hair loss and you don’t have to be anemic to have hair fall out. Hair follicles contain iron and when iron levels drop to low normal, hair not only falls out, but it also becomes dry, fragile and loses pigment. Severe hair loss can occur with low-normal iron. Women with low thyroid will also develop hair loss too. And you could be getting normal thyroid tests and still lose your hair. Lastly, hair loss can occur from not having enough minerals in the diet. Thankfully, we can halt hair loss by adding Ironsmart Liquid iron to increase iron levels quickly. Ironsmart has a delicious caramel taste and it does not constipate or cause digestive upset like other iron supplements”.

BARLEAN'S Omega Swirls: – TASTES Delicious! A Must for Kids and Adults that Can't Stand Fish Oil!!! Sweetened with Xylitol Recommended by Dentists! Fish oil is always at the top of the list for "MUST take!" Why? It benefits your heart, babies brain development, aids in autism/ADHD, colon health and helps skin conditions i.e. eczema! RECURRING URINARY TRACT INFECTION?

D-Mannose – Are you plagued with recurring urinary tract infections that antibiotics never seem to completely cure? Or do you hate the idea of subjecting your body to another round of antibiotics? D-Mannose just might be your answer! Every year millions of people (mostly women) suffer with urinary tract infections (UTIs). Nearly 90% of these infections are caused by the bacteria E.coli. Overuse of antibiotics can encourage the mutation of bacteria, creating antibiotic-resistance strains. Good news is you may never need an antibiotic for a UTI again! D-Mannose is an all natural product which may prove just as effective as an antibiotic. It serves as a kind of "magnet" in the urinary tract, attracting any present E. coli bacteria and keeping it from attaching to the bladder lining and dislodging any bacteria which are already attached! The bacteria "cling" to the D-Mannose molecules, and are flushed out with the normal urine flow. Bingo!

DR OZ RECOMMENDS UBIQUINOL

INNO-Q-NOL Ubiquinol - Oxidized or "Pre-converted" Form of CoQ10 CoQ10, a compound found in all cells, helps creates energy in the cell. Since Q10 provides energy to the cell, it is understandable that the highest concentrations of this vital nutrient are found in heart muscle. An organ which is constantly working, the heart has a huge demand for CoQ10; in turn, a deficiency can worsen problems such as angina, cardiomyopathy and high blood pressure. **CoQ10 comes in the form of Ubiquinone which is the most popular. Ubiquinol a new form of Q10 is much easier to be absorbed by the body especially for those who are over 40 and older and those who have conditions associated with aging. This is especially recommended for those who lack energy, have heart problems, diabetic, and high stress individuals. In Europe, it is mandatory for a doctor to prescribe Ubiquinol with Statin Drugs, accordingly to Dr. Mercola who appeared on Dr Oz show.**

MOOD? DEPRESSION? INSOMNIA?

5HTP (5-Hydroxytryptophan) 100mg
5HTP is produced after consuming food containing the amino acid L-Tryptophan e.g. milk, turkey. 5HTP is needed to produce Serotonin, an important neurotransmitter required for nerve, brain function and sleep. Due to stress, poor diet, many of us are deficient in Serotonin, which has been linked to depression, anxiety and sleep disorders, obesity and addiction. Two common prescribed medication, SSRI's and MAO inhibitors are used to regulate Serotonin levels. 5HTP is a natural alternative to re-establish normal Serotonin levels. NPN80021612

NEW X STRENGTH! LOWERS CHOLESTEROL

Red Yeast Rice X STRENGTH - 300mg

Not Available Until Now! Red Yeast Rice (RYR) is made by fermenting a type of Red Yeast. RYR contains a naturally occurring substance called **monocollins**. **Monocollins, particularly one called Lovastatin, is believed to be converted in the body to a substance that inhibits HMG-CoA reductase, an enzyme that triggers cholesterol production. This is the way the popular statin drugs work. Because of this action, Red Yeast Rice products containing a higher concentration of monocollins have been developed and marketed as a natural product to lower cholesterol. In addition to Red Yeast Rice, it also contains Phytosterols, Policosanol, Choline and Lecithin. An excellent formula to lower cholesterol naturally.**

VERY HIGH IN ASTAXANTHIN AND OMEGA-3!

Antarctic Superba Krill Oil - 500mg

Krill are small shrimp like crustaceans, and constitute one of the most abundant sources of marine nutrients on earth. The harvesting of krill is regulated by the Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR). Sunforce krill is harvested from the most pristine water on earth, using sustainable and ecologically sound high tech methods. **Krill oil is high in Omega-3 and some research points out that it reduces cholesterol and lowers LDL more dramatically than fish oil. Another is, krill contains an antioxidant called ASTAXANTHIN. The algae that krill eat produces the bright red pigment astaxanthin. Unlike many other antioxidant, astaxanthin crosses the blood-brain barrier, where it could theoretically protect the eye, brain and central nervous from free radical damage. Unlike fish oil, krill doesn't cause fishy burps or an after taste. Not recommended for those with bleeding disorders.**
