

Improve cholesterol levels IN 30 DAYS!

One-A-Day Sytrinol®

- Improves total cholesterol levels by 30%
- Improves LDL "bad" cholesterol levels by 27%
- Improves triglyceride levels by up to 34%
- Safe and effective

Clinical results have shown that sytrinol exerts effects very similar to cholesterol-lowering statin drugs but without side-effects.

The best news is that sytrinol worked independently of diet changes.

Four human clinical trials have demonstrated that sytrinol reduced total cholesterol by 30 percent, LDL cholesterol by 27 percent and triglycerides by 34 percent when compared to placebo in a double blind, placebo controlled crossover trial over 12 weeks.

Statistics from *Alternative Therapies in Health and Medicine*, Nov/Dec, 2007.
As per the study, 30% reduction occurred in the first four weeks.
